

Tyler Arboretum-ARS Rhododendron Test Garden Nomination Form

To be eligible for consideration, the original plant must have bloomed at least three seasons and must have at least six 2" or longer current years growth shoots for cuttings.

Name of cultivar (unnamed cultivars are acceptable with adequate documentation)

Type of rhododendron:

Elepidote:

Lepidote:

Hybridizer (indicate if deceased)

Hybridizer's contact info (or heirs if relevant)

Hybridizer's town, state

Parentage of cultivar if known

Known location(s) of cultivar available for propagation

Brief description of flower (and foliage if distinctive)

Dominant color of flower

Mature size of plant

Hardiness: cold

Tolerance: heat

The test garden is for cultivars hybridized (or grown from seed) in the mid-Atlantic region. The selection of test cultivars will be based on flower colors (especially distinctive coloration), distinctive foliage, plant habit, plant size (relative compactness preferred), cold and heat tolerance, disease resistance, and ease of propagation. Why cultivar nominated should be chosen.

Name of person submitting nomination
